Introduction

Namespace BTAI

Classes

Action

Call a method, or run a coroutine.

BT

BTNode

Block

Branch

Condition

Call a method, returns success if method returns true, else returns failure.

ConditionalBranch

Decorator

Log

Repeat

Run a block of children a number of times.

Root

Selector

Execute each child until a child succeeds, then return success. If no child succeeds, return a failure.

Sequence

Terminate

While

Run all children, while method returns true.

Enums

BTState
